Embrace the Future with Cloud-Native Technologies

At Nakisa, we are passionate about new ways of working and building SaaS products. We see huge potential in cloud nativity since it offers unprecedented flexibility, scalability, and speed of innovations.

All Nakisa solutions are built on microservices. Kubernetes, Kafka, Elasticsearch, KeyCloak, CI/CD frameworks, and many other state-of-art tech stacks help us create Cloud-Native cutting-edge solutions and bring unparalleled value to our clients.

Our Culture

Rafi Azad
Application Consultant @ Nakisa

Thanh Nguyen
Senior Solution Consultant @ Nakisa

Unity in Diversity

The best way to describe our culture is "unity in diversity". Our expertise at Nakisa comes from colleagues with various backgrounds. Built on mutual respect and integrity, our culture allows everyone to bring their best to the table.

We are happy to see people of different nationalities, cultures, races, genders, and orientations working together toward a unified goal.

Hear From Our People

Q: What do you like about Nakisa?

At Nakisa, each individual has a voice and sees the impact of his/her efforts on the team and company level – which I believe is very motivating. Also, the nonhierarchical attitude ensures a family-like spirit. The knowledgeable and diverse people at Nakisa make the environment very interesting and enjoyable.

Talar Manoukian
Project Manager @ Nakisa

We come from all walks of life, and we share those experiences to help each other grow. Most people I've met have been eager learners and quick to lend a hand when needed. Even as we shifted to working from home, and realized the challenge of staying social, my teams and I have always found ways to keep our day-to-day fun, and make sure we're taking care of each other.
