Trusted by the Fortune 1000

02 / Introducing the Nakisa Accounting Portfolio

Built for global enterprises with complex needs, the Nakisa Accounting Portfolio enables finance teams to automate lease accounting for portfolios of leased, subleased, and owned assets, such as equipment, fleet, real estate, and land. It manages everything from lease abstraction to administration, accounting, compliance, auditing, reporting, forecasting, and budgeting.

Our five product suites—Lease Accounting, Capital Investment and Budgeting, Portfolio Management, Capital Projects, and Facility Management—along with our agentic decision intelligence (NDI) platform, are designed to operate seamlessly together or as powerful standalone solutions, empowering finance teams with collaborative workflows, a unified data repository, and AI-driven automation.

Applications

**Nakisa Lease Accounting**

For end-to-end global lessee and lessor accounting and parallel compliance with IFRS 16, ASC 842, local GAAP, and government standards

**Nakisa Capital Investment and Budgeting**

For FP&A management of long-term major investments and expense control within approved budgets

**Nakisa Portfolio Management**

For end-to-end real estate lifecycle management (leased, subleased, owned assets)

**Nakisa Capital Projects**

For budget planning, scenario modeling, site selection, and project management

**Nakisa Facility Management**

For streamlined asset lifecycle and work order management (inspections, repairs, & maintenance)

### 03 / Nakisa Lease Accounting

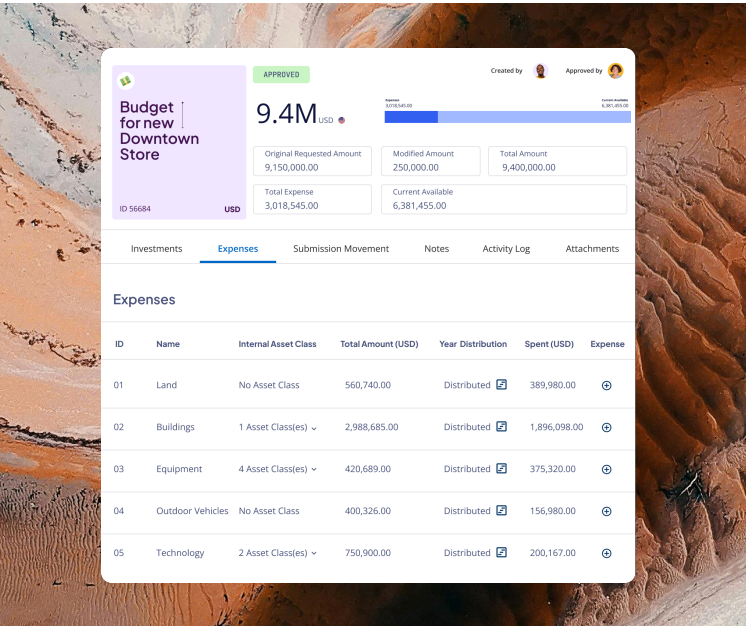

Offers a powerful, intuitive solution to centralize and automate the **full lifecycle of lease accounting**—from abstraction to reassessment, renewal, and termination—while ensuring parallel compliance with **IFRS 16, ASC 842, local GAAP, and government standards**. The suite features **advanced automation** for event management and batch operations, plus **AI capabilities** such as an AI Assistant for complex task navigation and AI Agents for document abstraction, analytics, charge management, and more, and handles **consolidations, intercompany transactions, and FX adjustments**.

It delivers a wide range of **out-of-the-box financial and disclosure reports**, including Income Statement, Balance Sheet, Cash Flow, Asset Roll Forward, Lease Liability, and Maturity Analysis, supporting regulatory filings like 10-K and 10-Q. Built with a **configurable multi-level approval system and collaborative workflows** and integrated with **leading ERP/AP systems and Nakisa IWMS**, it unites financial and operational data to improve collaboration and alignment across finance, real estate, and other cross-functional teams.

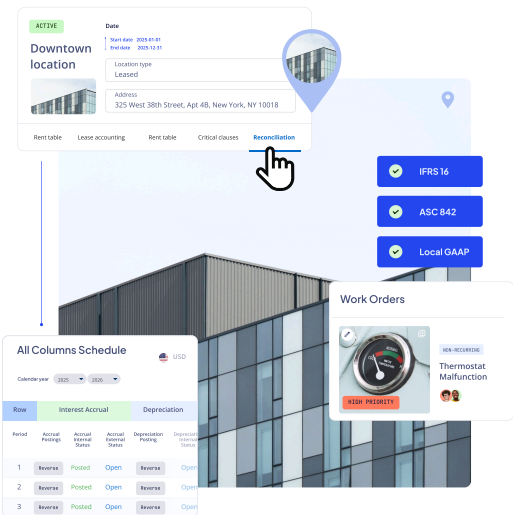

### 04 / Nakisa Capital Investment and Budgeting

Enables **alignment of major investments with financial goals** while keeping spending within approved budgets, supported by **accurate forecasting and scenario planning** that assess the impact of market trends, organizational changes, and contract terms. With **robust budget management and approval workflows**, teams can allocate, pre-approve, and adjust budgets while tracking commitments and actual invoices in real time. **Detailed financial reporting** further provides insights, highlights variances, and shows the true impact of contracts or events, ensuring clear oversight of financial positions.

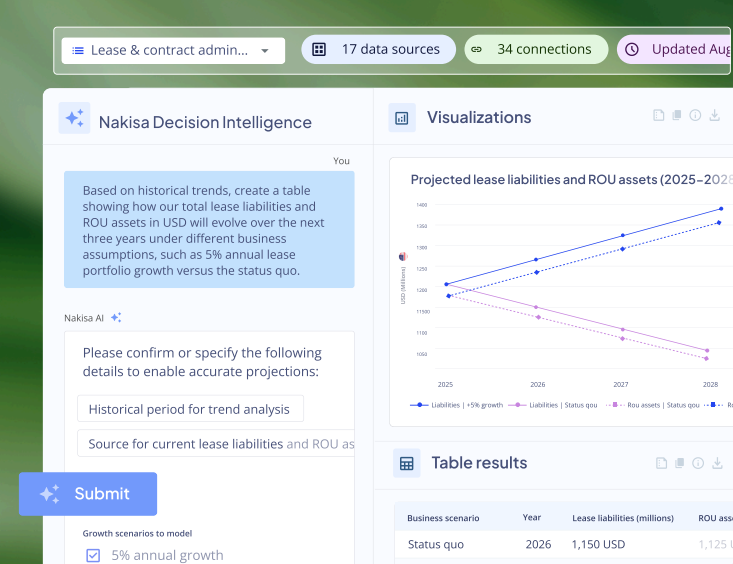

### 05 / Integration with Nakisa IWMS

The Nakisa Accounting Portfolio integrates seamlessly with the Nakisa IWMS Portfolio—including **Capital Projects, Portfolio Management, and Facility Management suites**. This integration enables teams to achieve their objectives through **collaborative workflows, a unified data repository for assets, costs, and investments, and AI-powered automation**—all within an intuitive, user-friendly interface with **purpose-built capabilities for each team**. It empowers organizations to drive strategic and operational excellence across all business functions.

## 07/ Decision Intelligence

**Transform complex, siloed data into confident action.** Our agentic solution unifies and interprets vast internal and external datasets across any system in real time. It goes beyond analysis, running forecasts, simulations, and visualizations, while providing expert guidance every step of the way. Ask complex business questions in natural language (text or voice) and get tailored recommendations you can execute instantly through Nakisa AI agents and apply directly to your ERP systems. The platform uncovers hidden opportunities, anticipates risks, accelerates decision-making, and strengthens team alignment—all while democratizing intelligence across the organization.

## 08 / What sets Nakisa apart?

**Innovative:** cloud-native architecture, continuous AI-powered innovation, centralized data hub, and dev extensions

**Integrated:** cross-product analytics, native bidirectional ERP integrations (SAP, Oracle, & Workday), and robust APIs

**Secure:** GDPR-ready, SOC 1 Type II, SOC 2 Type II, and ISO 27001 & 27017 compliant, with full ITGC control, RBAC, and multi-level approvals

**Client-centric:** our value advisory team helps understand the current state, recommends best practices, supports expert implementation and change management, and ensures client success

Our clients achieve:

**460k** USD/year operational savings (for 2,000 leases)

**71%** Time savings during period-end close

**97%** Data quality achieved

## 09 / Market leaders love Nakisa

“ We worked closely with the Nakisa team to build a solution that would fit the size and requirements of a corporation like Nestlé and that would bring value to other similar organizations in terms of scale and accuracy. Nakisa has a lot to offer in terms of flexibility, user-friendliness, ERP integration and its cloud solution. The upgrade was done by the Nakisa team without any major issues. It was smoother than we could have anticipated considering the volume of historical data.

Dana Jircikova, Head of Capital and Financial Investments Reporting at Nestlé

“ Nakisa allowed us to close our books a week before month-end. Now anyone can easily run a report the last week of the month to verify depreciation, cost centers, and other aspects and ensure they are all correct. We are starting to use the automation of contract uploads and mass lease modifications, and they are going to be a huge win for us.

Alanna Bilben, Business Transformation IT RTR Lead at 3M
