02 / Introducing the Nakisa IWMS Portfolio

Serving global enterprises with complex needs, Nakisa offers an Integrated Workplace Management System (IWMS) that empowers real estate, finance, capital project, and facilities teams to achieve their goals through collaborative workflows, a unified data repository, and AI-powered automation—all within an intuitive interface.

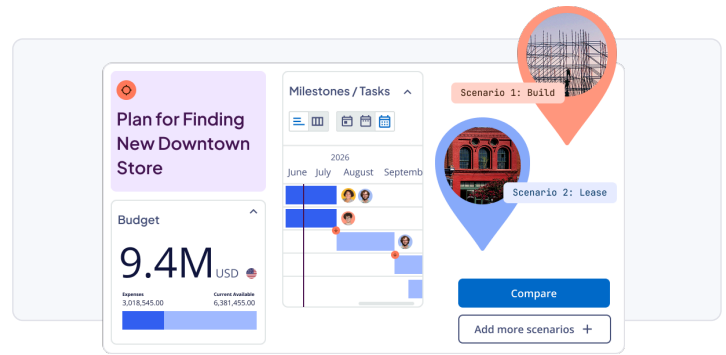

Our four product suites—Capital Projects, Portfolio Management, Lease Accounting, and Facility Management—together with our agentic decision intelligence (NDI) platform, operate seamlessly as a unified system or as powerful standalone solutions, driving strategic decision-making and operational excellence across business functions.

Applications	<p>Nakisa Capital Projects</p> <p>For budget planning, scenario modeling, site selection, and project management</p>	<p>Nakisa Portfolio Management</p> <p>For end-to-end real estate lifecycle management (leased, subleased, owned assets)</p>	<p>Nakisa Lease Accounting</p> <p>For global lease accounting and compliance (IFRS 16, ASC 842, local GAAP)</p>	<p>Nakisa Facility Management</p> <p>For streamlined asset lifecycle and work order management (inspections, repairs, & maintenance)</p>	<p>Nakisa Decision Intelligence Platform</p> <ul style="list-style-type: none"> ✦ Nakisa Agentic AI ✦ Nakisa Agentic Tools ✦ Nakisa Multi-Model AI Core

03 / Capital Projects

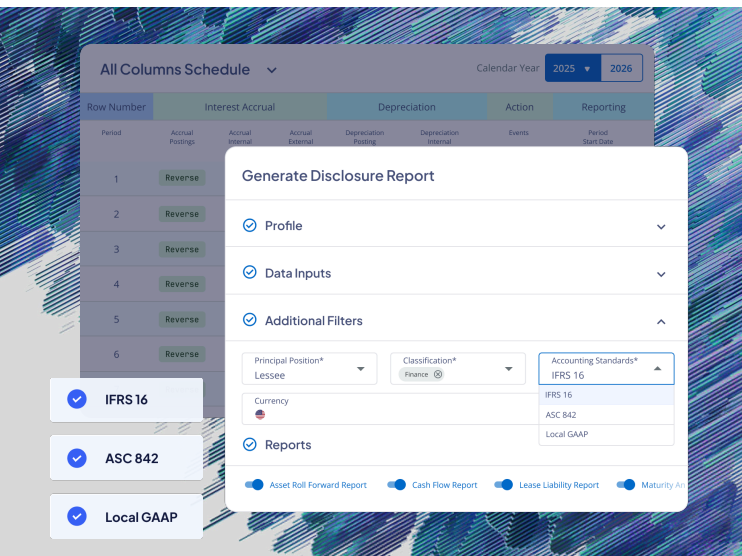

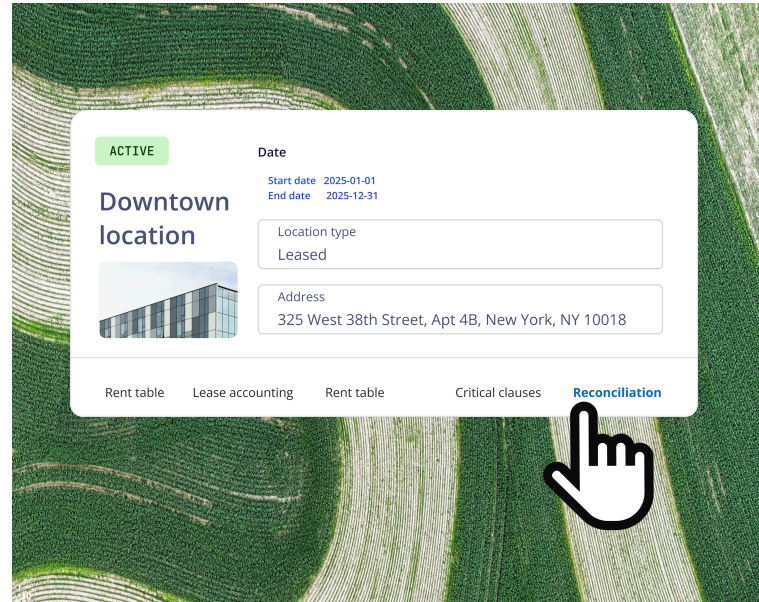

Empowers teams to confidently plan, prioritize, and execute any capital project. Robust **scenario modeling**, side-by-side **site evaluations**, and comprehensive budget and cost tracking help teams make informed planning decisions. With **AI Agent for milestones** and powerful analytics, project management tools help streamline execution and drive maximum ROI.

04 / Portfolio Management

Offers a powerful and intuitive solution to centralize and automate the management of expense, income, and owned assets. Track contractual obligations with **critical date alerts**, manage asset lifecycles, and automate **complex calculations**, including escalating, indexed, and variable rent, as well as year-end reconciliations (CAM, taxes, insurance).

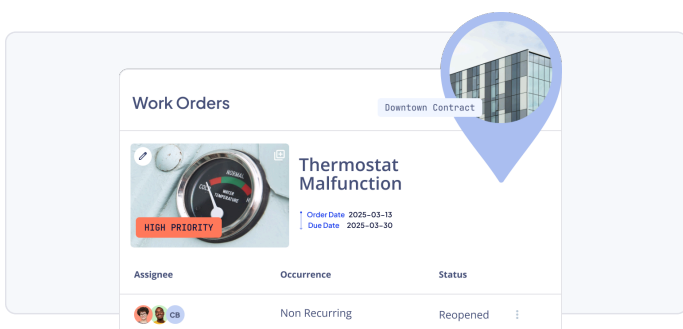

The suite offers advanced automation through AI agents (including **AI Document Abstraction**, **AI Agent for analytics**, **AI Agent for complex calculations**), as well as native bidirectional ERP integration, a configurable multi-level approval system and collaborative workflows. It also provides the vendor portal and transparent invoice management for streamlined external collaboration.

05 / Lease Accounting

Delivers true **contract- and asset-level lease accounting** with seamless parallel compliance for **IFRS 16**, **ASC 842**, **local GAAP**, and government accounting standards. The suite offers robust functionality for lease accounting, event management, and batch operations. It provides a wide range of out-of-the-box financial reports—including Income Statement, Balance Sheet, and Cash Flow—as well as detailed disclosure reports such as Asset Roll Forward, Lease Liability, and Maturity Analysis to support regulatory filings like 10-K and 10-Q.

With clear visibility into lease obligations and their financial impact combined with **native bidirectional ERP integrations**, finance teams are better positioned to support planning, forecasting, and broader business decision-making.

06 / Facility Management

Provides a centralized system to manage facilities through **predictive, preventative, and scheduled maintenance** and real-time incident tracking. Designed to streamline coordination of internal technicians and external contractors, the solution offers integrated work order management, **AI Agent for inspections**, asset condition monitoring, and a **mobile service desk** to ensure improved facility performance and extended asset lifespan.

ST-0018	Spain	Barcelona	EUR	730 USD

07/ Decision Intelligence

Transform complex, siloed data into confident action. Our agentic solution unifies and interprets vast internal and external datasets across any system in real time. It goes beyond analysis, running forecasts, simulations, and visualizations, while providing expert guidance every step of the way. Ask complex business questions in natural language (text or voice) and get tailored recommendations you can execute instantly through Nakisa AI agents and apply directly to your ERP systems. The platform uncovers hidden opportunities, anticipates risks, accelerates decision-making, and strengthens team alignment—all while democratizing intelligence across the organization.

08 / What sets Nakisa apart?

Innovative: cloud-native architecture, continuous AI-powered innovation, centralized data hub, and dev extensions

Integrated: cross-product analytics, native bidirectional ERP integrations (SAP, Oracle, & Workday), and robust APIs

Secure: GDPR-ready, SOC 1 Type II, SOC 2 Type II, and ISO 27001 & 27017 compliant, with full ITGC control, RBAC, and multi-level approvals

Client-centric: our value advisory team helps understand the current state, recommends best practices, supports expert implementation and change management, and ensures client success

Our clients achieve:

60% Enhanced operational efficiency

35% Reduced enterprise asset lifecycle costs

97% Data quality achieved

09 / Market leaders love Nakisa

“ Nakisa is excellent software, it makes us more efficient with all the rent payments and follow-ups on the deadlines, renewals, deposits, etc. It creates custom-made reports for our financial statements, which are used to communicate information to various teams and help them with budgeting. The software is very user-friendly; it is essential for our real estate department.

Eric Cabana, Senior Real Estate Advisor at TC Transcontinental

“ Nakisa has a lot to offer in terms of flexibility, user-friendliness, and ERP Integration. The integration is really important, we don't need to worry and run complex reconciliations every month.

Dana Jirickova, Head of Capital and Financial Investments Reporting at Nestlé
